

Be ebook smart.

Capitalize on the eBook Trend with Jumpbooks™ — NBC's Digital Delivery Solution

Campus bookstore requests for ebook offerings have been the springboard for Nebraska Book Company's digital delivery solution. The idea is that today's students should have the choice of ebooks — in addition to new and used books. Digital delivery has generated industry buzz: stocking ebooks has even been equated with being an innovative retailer. At Nebraska Book Company (NBC), we always listen to customer needs and work to develop the solutions that will lead to optimum campus bookstore success.

Digital Delivery Trend

While the Internet plays an increasingly important role in how bookstores sell textbooks, it is also changing how textbooks are delivered. Capitalize on the ebook trend by adding Jumpbooks™ to your textbook offering.

Jumpbooks Make Selling eBooks A Snap

1. You simply hang a printed Jumpbook tag next to the printed textbook in your bookstore
2. The student takes the tag to the cashier to purchase the Jumpbook(s)
3. When the tag is scanned or entered, NBC's delivery system generates a single download code and delivers it to the PRISM, WinPRISM or Jumpbooks web POS
4. The code appears at the bottom of the student's receipt along with download instructions
5. The student downloads the ebook to his or her hard drive through a centralized web application customized to your bookstore and managed by NBC

Get eBook Smart Today with Jumpbooks

- Works independently with any bookstore management system OR integrates easily into your bookstore's existing PRISM or WinPRISM POS system
- Uses a single receipt for one or more ebook purchases — students do not need to keep track of multiple ebook cards
- Makes textbook returns easy through the single receipt method
- Has customizable, reusable hang tags that can be placed conveniently right next to the physical book — no extra merchandise or ebook cards to stock
- Customized to fit your bookstore
